DESCRIPTION OF THE OIL
This oil is a high quality, low viscosity, multi-grade motor oil. It is designed for use in modern engines and provides excellent protection against wear and tear. The oil is formulated with advanced additives to ensure long life and maximum performance.

APPLICATIONS AND RECOMMENDATIONS
This oil is suitable for use in all types of modern engines, including those found in cars, trucks, and motorcycles. It is also suitable for use in industrial machinery and power tools.

Product meets & exceeds the requirements of
SAE J300, J300A, J300B, J300C, J300D, J300E, J300F, J300G, J300H, J300I, J300J, J300K, J300L, J300M, J300N, J300O, J300P, J300Q, J300R, J300S, J300T, J300U, J300V, J300W, J300X, J300Y, J300Z.

Features & Benefits

- Excellent compatibility with various seal materials found in modern engines.
- Exceptional thermal and oxidation stability helps prevent oil degradation to help provide outstanding performance.
- Excellent low temperature pumpability and circulation, to ensure quick start performance.
- Good foam control leads to smooth gear shifting.

Health and Safety
The Safety Data Sheet is available on request and describes the proper use and handling of the product. It also provides information on the potential hazards of the product and the measures that should be taken to avoid them.

Further Information
For further information, please contact your local distributor or the Japan Oil Sales Office.
